Pump-Pac Micro

A Range of Compact Pump Systems for Wastewater Applications

New for 2008, Envirocare's renowned Pump-Pac range is joined by the Micro series of compact pump stations.

Designed for rapid installation, the chambers provide simple and speedy dewatering of buildings and areas below the sewer level and are suitable for pumping wastewater in accordance with DIN/EN 12056.

Applications

- Outbuildings and extensions
- External WCs
- Cellars
- Pool houses

Chambers are suitable for effluent and sewage dependent on pump specification, required distance and lift.

Features

- Ready for simple and immediate installation
- Fully adjustable for height and floor level alignment
- Non-return valves as standard
- Protective cover for protection during installation
- Manufactured from tough polyethylene
- Corrosion resistant
- Outlet pipe compression fittings as standard

Design

All Micro systems consist of a polyethylene chamber fitted with a quality pump, float switch, non-return valves, pedestrian duty cover and frame, cover plate and all connections.

Product Specification

Chamber Type	Chamber Dia.	Chamber Height	Base to Centre of Inlet	Base to Centre of Outlet	Inlet Dia.	Outlet Fitting for MDPE Pipe
A	720	790-920	340	350	100/150	63
B	530	670-800	340	350	100	50

Installation & Operation

The access neck and cover are universally adjustable in height and can be rotated to allow easy alignment with flooring and landscaping design, independent of the inflow or discharge line directions.

A protective cover for the access neck is supplied for use during installation to prevent backfill from damaging the access cover.

Access neck extension piece is available as part of the package to facilitate a further 150mm inlet depth if required.
